

# LipoPort™

LipoPort™ is a must-have for any surgeon performing liposuction. It improves the aesthetic outcome of incisions and aids in wound healing by saving the skin from friction burns.

LipoPort™ can be used with both manual and power-assisted liposuction procedures. This product is reusable and made in the USA.

**B 89LP34** LipoPort™ Medium accommodates 2–4 mm cannula

**B 89LP5** LipoPort™ Large accommodates 3–5 mm basket cannula and up to 6 mm standard cannula

- Saves the skin from friction burns and aids in wound healing
- Improves aesthetic outcome of incisions
- Reusable / autoclavable
- Easy to insert and anchor with 3-0 nylon suture
- Accommodates straight and angled power-assisted, laser-assisted, and standard cannulas
- External notch facilitates optimal cannula orientation
- Two convenient sizes that accommodate most cannulas

LipoPort™ designed by John Connors, MD, plastic surgeon, Atlanta, GA.
